Cigarettes, ice cream, figurines of the Virgin Mary
Herywalery

zen black

The Zen Black lamp features two rings of light: a central one, in an intensive shade (you can choose between red, fluorescent orange and others, made to order), and a matching glow of warm, white light around the lamp. This will make you your senses focused and help you relax.

zen color

The Zen lamp shines in a circular shape within the centre of a circle. The light subtly shines from the whole surface of the lamp. You can choose the ambience you want for your room. The shade and brightness can be adjusted with a pilot (included), and the colours can be animated in various ways.

libido

Libido is a lamp which will invigorate your senses. The colour and brightness of the light can be adjusted, and the colours can be animated. Its exceptional shape stimulates the imagination and rouses energy. All functions can be controlled by a pilot. The middle part can be arranged as fit.

Herywalery

Herywalery is a brand created by Bartek Bartosiński. The items designed under this name are released in small numbers - just a few pieces or small batches.

Herywalery participates in design festivals both in Poland and abroad. He has been applauded by the collectors of utilitarian art.

Herywalery has focused on lamps made with upcycling in mind. The new series presented here are a brand new page, featuring exceptional possibilities of defining light and space.

Zen and Libido series can be mounted either on the wall or on the ceiling, and the cable can be respectively either hidden in the wall, or ended with a plug. Zen is a milky circle, but Libido has a shape that brings to mind many different associations.

The light source are LED strips - ecological and safe, allowing you to use them in many different ways.

Zen and libido lamps are made to fulfill

your needs - you will find a lamp in any size and colour and for any purpose.

All lamps are made of acrylic glass. This material is recyclable, so you can be sure that if you take care to recycle the lamp, it will get a second life.
